REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-6 is the inclusion of the limitations of a printer controller that includes first and second printhead chips configured such that in the event that the printhead chips to which dot data is being supplied are of sufficiently unequal relative length, the dot data is supplied more frequently, or at a higher rate, to the longer of the two printhead chips. It is these limitations found in the claims, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 6874863 to Usui et al., US 2004/0095422 A1 to Eguchi et al., and US 6559969 to Lapstun.

Usui et al. (6874863) and Eguchi et al. (US 2004/0095422 A1) generally disclose adjacent printhead chips having different lengths, but do not teach transferring data to the printhead.

Lapstun (6559969) teaches a printhead controller for controlling at least one printhead, but does not teach supplying data more frequently to a larger printhead chip.
